Electronic Power Design

Recruiting for: Full-time

Electronic Power Design (EPD) is a leading U.S. manufacturer of low-voltage electrical distribution equipment. Since 1986, we have partnered with data centers, healthcare facilities, commercial campuses, industrial plants, and mission-critical operations to deliver power solutions that never compromise performance or reliability. From initial concept and in-house engineering through UL certification and on-time delivery, EPD provides the expertise required to meet the most demanding electrical requirements.

At EPD, we don't just build switchboards, we engineer reliability. Our in-house teams of engineers, fabricators, and technicians design and manufacture equipment that performs in the most demanding environments.

Lockheed Martin

Recruiting for: Full-time, Internship

Not all first jobs are created equal.

This is an opportunity to work on real-world technologies that make a difference. You might support the design of next-generation aircraft, help develop autonomous systems, contribute to AI research, or play a role in advancing space capabilities. The work is complex, and your contributions will matter.

You will be part of a team that values technical skill, curiosity, and collaboration. From day one, you will be trusted to take ownership of meaningful projects. You will learn from experienced professionals, access the tools and support you need to grow, and see how your work connects to larger missions in defense, exploration, and innovation.

This is a place for engineers, scientists, and problem-solvers who are ready to engage deeply and think critically.
